## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,14,29,37,43,44,52,75,76,99,103,107,108 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Moerke 599'.

Note that Moerke teaches quick connect and disconnect body 70,71 at the proximal end of the welding station (welding head), for ease of connection and disconnection. Easy replacement of consumables is attained without full disassembly of the torch, as claimed. Note that the lead distal pin for the gas in combination with the hose is considered a gas control element since the same effects supply of the gas to the head.

### ***Allowable Subject Matter***

Claims 15,28,35,36,45-51,54-65,66-71,98,101,102,105,106 are allowed.

Claims 3-13,30-34,38-42,53,77-97,100,104 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3742

The following is a statement of reasons for the indication of allowable subject matter: these claims contain allowable subject matter for the same reasons set forth in the prior office action.

***Response to Arguments***

Applicant's arguments with respect to claim 1-108 have been considered but are moot in view of the new ground(s) of rejection.
